## Systems, Systems

I know that many of us are about the work of learning to see systems and contributing with more holistic perspective. I'm glad for that.

Whether it's thinking about how wolves change the flow of rivers — because of all that interconnectedness, or watching last night's NBA basketball playoff game, seeing star Kevin Durant perhaps over exert his existing calf muscle strain into an achilles injury.

It's all connected. The Zen phrase continues to guide the design that I offer with groups, teams, and communities — Everything is connected. Everything changes. Pay attention.

I'm grateful to being applying such insights with a few groups recently: in Utah at Weber State's Intermountain Sustainability Summit, in Ohio with community organizers in a 2-Day retreat, and also in Ohio at the QT retreat.

Together, we go further.

A handwritten signature in black ink that reads 'Tenneson Woolf'.
